# The S3 guideline on lymphoedema in all aspects

Dear Sir or Madam,  
Dear Colleagues,

The project to develop the S3 guideline for lymphoedema has been a major focus for us over the last three years.

The existing S2k guideline for the diagnosis and treatment of lymphoedema served as a starting point and has now been upgraded to an S3 guideline, thereby achieving the highest level of evidence. This means that the entire care and therapy chain from prevention, diagnosis, conservative and surgical therapy, rehabilitation and outpatient care is now taken into account.

The focus of the project work in the individual working groups has been on the development and implementation of standards for diagnosis, interdisciplinary therapy and aftercare, primary and secondary prevention, and psychosocial education.

“New brooms sweeps clean” - Let us take a closer look at the topics covered by the new guideline and discuss together what they could mean for everyday clinical practice and for an optimal therapy outcome for our patients.

We cordially invite you to join us in Wolfsburg!

Kind regards,  
Prim.a Dr. med. Berit Payer  
Conference chair
